

The World's Best Backbone Providers

CompTech Care 'Inside-Out Network' provides the unique ability for your data to travel over the optimal path to reach its destination using BGP4 routing protocol. This is done through utilizing direct connections to several leading Internet backbone providers. We have the following bandwidth connections to our backbone providers:

- DS3 to QWest (45 Mbits)
- DS3 to UUNet (45 Mbits)
- OC3 to UUNet (155 Mbits)
- OC3 to Global Crossing (155 Mbits)
- OC3 to AT&T (155 Mbits)
- OC3 to AT&T (155 Mbits)

Listed below are the current maps for the providers we use:
